

Franklin Wagbara

Senior Software Engineer | Abuja, FCT 500272 | 0814 477 8023 | wagbarafranklin@yahoo.com | franklin-g-wagbara.netlify.app/

Professional Summary

Senior Software Engineer and Technical Lead with 9+ years of experience, including 6+ years in senior leadership roles, delivering high-performance, enterprise-grade systems across banking, fintech, and SaaS domains. Specialized for 8+ years in C#, ASP.NET, and .NET Core, with strong full-stack expertise in React, Angular, Node.js, TypeScript, and JavaScript. Proven leader of cross-functional engineering teams, driving over 30%+ throughput improvements, over 40%+ latency reductions, and 80%+ performance gains on business-critical features through system modernization and architectural optimization. Experienced in training and fine-tuning large language models (LLMs)-including contributions to Gemini 2.5 Pro-to improve the accuracy, reliability, and production readiness of AI-generated C#/.NET and React solutions. Recognized for critical thinking, performance-driven architecture, and delivering scalable, measurable outcomes through collaborative engineering practices.

Experience

Innoscripta

Senior Software Engineer

Munich, Germany

July 2025 - Present

- Driving improvements to the performance, scalability, and reliability of a multi-tenant enterprise platform built on microservices, microfrontend, and event-driven architectures.
- Led the optimization of a high-traffic, latency-critical feature previously known for poor performance, achieving an 80%+ reduction in latency and significant overall performance gains.
- Recognized by engineering leadership for delivering a measurable improvement to a business-critical feature with stringent performance requirements.
- Enhanced system responsiveness and throughput through architecture-level optimizations, improved async processing, and refined service boundaries.
- Strengthened tenant isolation and scalability by improving data access patterns, request orchestration, and event handling.
- Designed and refined microfrontend integration patterns enabling independent deployment and improved frontend performance at scale.
- Collaborated closely with product, platform, and DevOps teams to ensure performance improvements aligned with business growth objectives.
- Provided senior-level technical leadership via code reviews, performance profiling, and mentoring, ensuring long-term maintainability and stability

Turing.com

Senior Software Engineer (Contract)

Palo Alto, CA, USA

July 2024 - July 2025

- Contracted by Turing.com to contribute to the training and refinement of Gemini 2.5 Pro, specializing in C#, .NET Core internals, and React-based frontend engineering.
- Provided expert-level guidance and validation for model outputs related to .NET runtime behavior, async/await, threading, memory management, performance optimization, and modern React patterns.
- Improved model accuracy and reasoning quality for full-stack scenarios involving React frontends integrated with .NET Core backend services.
- Reviewed, corrected, and refined AI-generated C#/.NET and React code to ensure correctness, scalability, security, and production readiness.
- Designed real-world prompts, reference implementations, and edge-case test cases covering enterprise-grade React component architecture, state management, API integration, and performance considerations.

- Identified hallucinations, flawed abstractions, and anti-patterns in both backend and frontend outputs, significantly improving consistency and reliability.
- Collaborated within a highly selective senior contributor pool, supporting iterative improvements across multiple model training cycles.

EPS

Vilnius, Vilnius City Municipality, Lithuania

Lead Software Engineer

December 2023 - July 2024

- Led a cross-functional team of 8 engineers (developers and QA) in the end-to-end modernization, redesign, and re-architecture of a legacy banking infrastructure supporting critical financial operations.
- Re-architected monolithic systems into scalable, high-performance components, significantly improving system resilience, maintainability, and deployment velocity.
- Delivered over 30% improvement in transaction throughput by optimizing service boundaries, data flows, and asynchronous processing.
- Achieved 40%+ reduction in system latency through performance tuning, improved API design, and infrastructure-level optimizations.
- Collaborated closely with product, infrastructure, and operations teams to ensure minimal downtime during migration and seamless rollout of the redesigned platform.
- Acted as technical owner and decision-maker, defining architectural direction, reviewing critical code paths, and mentoring senior and mid-level engineers.
- Established performance baselines and KPIs to measure and validate business impact, ensuring improvements were measurable, repeatable, and sustainable.

BrandoneTech

Abuja

Team Lead - Chief Software Engineer & Architect

June 2023 - December 2023

- Supervised daily tasks for a team of engineers, fostering an environment that emphasizes innovation, collaboration, and quality.
- Implemented scalable, API-centric infrastructures and modular solutions, with a focus on efficiency and maintainability in C#, ASP.NET, .NET Core, Angular, ReactJs.
- Designed, developed, and maintained payment gateway for clients.
- Contributed to LLM training efforts, incorporating AI models for code generation, error handling, and automatic documentation generation, resulting in increased development efficiency.
- Mentored and coached team members to ensure successful performance.
- Directed a cross-functional team in developing AI-integrated backend components to support scalable, API-centric infrastructures, utilizing C#, .NET Core for high-performance data handling.
- Championed code-creation technologies, enabling faster prototyping and reducing errors through automated code quality checks and AI-assisted refactoring tools.

BrandoneTech

Abuja, CA

Senior Software Engineer

October 2022 - June 2023

- Focused on developing AI-driven enhancements to existing applications, including automation scripts for testing and error handling, resulting in a 25% reduction in debugging time.
- Provided leadership in AI and machine learning integration, ensuring reliable, high-performance backend components and best practices in AI code validation.
- Designed, developed, and maintained payment gateway for clients using C#, ASP.NET, .NET Core, Angular.
- Designed enhancements and updates for subsystems of end-user applications software running on local, networked and Internet-based platforms.
- Lead and participate in the full software development lifecycle, from requirements analysis to deployment and maintenance.

- Played a key role in training and deploying LLMs to automate complex coding tasks and support AI-assisted decision-making processes, increasing backend system performance.
- Trained and mentored junior developers and engineers, teaching skills in Software development and working to improve overall team performance.

Brookstone

Port Harcourt

Senior Software Engineer

September 2019 - September 2022

- Led multiple large-scale projects and conducted extensive code reviews, maintaining adherence to industry standards.
- Trained and mentored team members, emphasizing quality and adherence to best practices across multiple languages and frameworks, including C#, .NET Core, C/C++, ReactJs, Angular.
- Worked with more than 50 customers for needs analysis, proposal development and vendor costs to produce competitive estimates.
- Wrote highly maintainable, solid code for software system using C#, ASP.NET, .NET Core, ReactJs, forming core framework and earning consistent praise from subsequent developers since initial version.
- Key Technologies used include; C#, .Net Core, C/C++, ReactJs, Angular, NodeJs, Javascript, Typescript, SASS, MongoDB, MySQL, SQL, PostgreSQL, Redis, Java, Python, Firebase, Azure DevOps, GCP, TDD, RESTAPI, MVC Framework, Docker, Kubernetes.

Dietams

Port Harcourt

Senior Software Engineer

December 2017 - August 2019

- Performed code reviews to ensure quality standards were met by development teams.
- Designed, developed, tested, and deployed high-quality applications utilizing Agile methodology.
- Key Technologies used include; C#, ASP.NET, .NET Core, ReactJs, Angular, NodeJs, Javascript, Typescript.

Multichoice

Port Harcourt

Software Engineer

January 2017 - December 2017

- Planned and developed interfaces that simplified overall management and offered ease of use.
- Documented technical workflows and knowledge in private wiki for education of newly hired employees.
- Designed intuitive graphical user interfaces using knowledge of serial communications and database design to improve user experience.
- Participated in cross-functional projects while working in lean development environments.
- Key Technologies used include; Angular, ReactJs, NodeJs, AngularJs, MongoDB, SQL, PostgreSQL, Javascript, Typescript, SASS, C#, .Net, Java, Python, Firebase, GCP, REST API, MVC Framework.

SaskTel Inc.

Port Harcourt

Software Engineer Intern

June 2016 - January 2017

- Brainstormed with engineering team to determine appropriate code testing processes.
- Collaborated with other developers to identify and alleviate number of bugs and errors in software.
- Key Technologies used include; C#, ASP.NET, .NET Core, C/C++, ReactJs, Angular, Javascript, Typescript, Java.

Skills

Angular Material · Automation Test · ExpressJS · GCB · Integration Test · Material UI · MSSQL · NodeJS · Postgres · ReactJS · Tailwindcss · TDD (Test Driven Development) · Unit Test · .Net Core · Angular · ASP.NET MVC · AWS · Azure DevOps · Big Data · C# · C/C++ · CSS · Django · Docker · Firebase · Git · Github · GitLab · HTML · Java · Javascript · Jira · Kanban · Kubernetes · Linux · MongoDB · MySQL · NextJS · Python · Redis · Redux · SaaS · Sass · Scrum · SQL · TypeScript · Windows

Education

University of Regina

Bachelor of Science | Computer Science

University of Regina
