FRANKLIN WAGBARA

SENIOR SOFTWARE ENGINEER - TEAM LEAD

CONTACT

Abuja, FCT 500272

0814 477 8023

wagbarafranklin@yahoo.com

PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 9+ years of experience, including 6+ years in senior leadership roles, delivering high-performance, enterprise-grade systems across banking, fintech, and SaaS domains. Specialized for 8+ years in C#, ASP.NET, and .NET Core, with strong full-stack expertise in React, Angular, Node.js, TypeScript, and JavaScript. Proven leader of cross-functional engineering teams, driving over 30%+ throughput improvements, over 40%+ latency reductions, and 80%+ performance gains on business-critical features through system modernization and architectural optimization. Experienced in training and fine-tuning large language models (LLMs)—including contributions to Gemini 2.5 Pro—to improve the accuracy, reliability, and production readiness of AI-generated C#/.NET and React solutions. Recognized for critical thinking, performance-driven architecture, and delivering scalable, measurable outcomes through collaborative engineering practices.

EXPERIENCE

Senior Software Engineer Innoscripta - Munick
01/2025 - Present

- Driving improvements to the **performance, scalability, and reliability** of a **multi-tenant enterprise platform** built on **microservices, microfrontend, and event-driven architectures**.
- Led the optimization of a **high-traffic, latency-critical feature** previously known for poor performance, achieving an **80%+ reduction in latency** and significant overall performance gains.
- Recognized by **engineering leadership** for delivering a measurable improvement to a business-critical feature with stringent performance requirements.
- Enhanced system responsiveness and throughput through **architecture-level optimizations**, improved async processing, and refined service boundaries.
- Strengthened **tenant isolation and scalability** by improving data access patterns, request orchestration, and event handling.
- Designed and refined **microfrontend integration patterns** enabling independent deployment and improved frontend performance at scale.
- Collaborated closely with **product, platform, and DevOps teams** to ensure performance improvements aligned with business growth objectives.
- Provided senior-level technical leadership via **code reviews, performance profiling, and mentoring**, ensuring long-term maintainability and stability

Senior Software Engineer (Contract) Turing.com - Palo Alto, CA
11/2024 - 04/2025

- Contracted by **Turing.com** to contribute to the training and refinement of **Gemini 2.5 Pro**, specializing in **C#, .NET Core internals, and React-based frontend engineering**.
- Provided **expert-level guidance and validation** for model outputs related to **.NET runtime behavior, async/await, threading, memory management, performance optimization**, and **modern React patterns**.
- Improved model accuracy and reasoning quality for **full-stack scenarios** involving **React frontends integrated with .NET Core backend services**.
- Reviewed, corrected, and refined **AI-generated C#/.NET and React code** to ensure correctness, scalability, security, and production readiness.
- Designed **real-world prompts, reference implementations, and edge-case test cases** covering enterprise-grade **React component architecture, state management, API integration, and performance considerations**.
- Identified hallucinations, flawed abstractions, and anti-patterns in **both backend and frontend outputs**, significantly improving consistency and reliability.
- Collaborated within a **highly selective senior contributor pool**, supporting iterative improvements across multiple model training

SKILLS

- C#
- ASP.NET MVC
- .NET Core
- Angular
- ReactJS
- Typescript
- Javascript
- Java
- NextJS
- NodeJS
- ExpressJS
- Redux
- Angular Material
- CSS
- SASS
- HTML
- Python
- C/C++
- Django
- Tailwindcss
- MySQL
- MSSQL
- Redis
- Postgres
- SQL
- Firebase
- MongoDB
- AWS
- Azure DevOps
- Material UI
- Unit Test
- Integration Test
- Automation Test
- GCB
- SaaS
- Big Data
- Git
- GitHub
- GitLab
- Docker
- Kubernetes
- Windows
- Linux
- TDD (Test Driven Development)
- SCRUM
- KANBAN
- JIRA

cycles.

Lead Software Engineer EPS - Vilnius
01/2024 - 12/2024

- Led a **cross-functional team of 8 engineers (developers and QA)** in the **end-to-end modernization, redesign, and re-architecture** of a legacy banking infrastructure supporting critical financial operations.
- **Re-architected monolithic systems into scalable, high-performance components**, significantly improving system resilience, maintainability, and deployment velocity.
- Delivered **over 30% improvement in transaction throughput** by optimizing service boundaries, data flows, and asynchronous processing.
- Achieved **40%+ reduction in system latency** through performance tuning, improved API design, and infrastructure-level optimizations.
- Collaborated closely with **product, infrastructure, and operations teams** to ensure minimal downtime during migration and seamless rollout of the redesigned platform.
- Acted as **technical owner and decision-maker**, defining architectural direction, reviewing critical code paths, and mentoring senior and mid-level engineers.
- Established performance baselines and KPIs to **measure and validate business impact**, ensuring improvements were measurable, repeatable, and sustainable.

Lead Software Engineer FCMB (First City Monument Bank) - Abuja, FCT
01/2024 - 12/2024

- Spearheaded the design, development, and architecture of a microservices-driven application using event-driven principles to improve scalability and resilience using C#, ASP.NET, .NET Core.
- Leveraged AI-powered tools, including GitHub Copilot, powered by LLMs I trained, to streamline code generation and automate repetitive tasks, improving developer productivity by 30%.
- Led efforts to validate and refine AI-generated code, ensuring alignment with industry standards, high efficiency, and compatibility across large codebases (500K+ LOC).
- Led technical documentation and architectural planning, ensuring best practices in C# and .NET development.
- Coordinated with cross-functional teams such as DevOps and Infrastructure teams to ensure successful deployments using Azure DevOps and Web services, and AWS.
- Developed and validated AI-driven code, ensuring high standards in functionality, efficiency, and maintainability.

Team Lead - Chief Software Engineer & Architect BrandoneTech - Abuja
06/2023 - 12/2023

- Supervised daily tasks for a team of engineers, fostering an environment that emphasizes innovation, collaboration, and quality.
- Implemented scalable, API-centric infrastructures and modular solutions, with a focus on efficiency and maintainability in C#, ASP.NET, .NET Core, Angular, ReactJs.
- Designed, developed, and maintained payment gateway for clients.

- REST
- GraphQL

- Contributed to LLM training efforts, incorporating AI models for code generation, error handling, and automatic documentation generation, resulting in increased development efficiency.
- Mentored and coached team members to ensure successful performance.
- Directed a cross-functional team in developing AI-integrated backend components to support scalable, API-centric infrastructures, utilizing C#, .NET Core for high-performance data handling.
- Championed code-creation technologies, enabling faster prototyping and reducing errors through automated code quality checks and AI-assisted refactoring tools.

Senior Software Engineer BrandoneTech - Abuja
10/2022 - 06/2023

- Focused on developing AI-driven enhancements to existing applications, including automation scripts for testing and error handling, resulting in a 25% reduction in debugging time.
- Provided leadership in AI and machine learning integration, ensuring reliable, high-performance backend components and best practices in AI code validation.
- Designed, developed, and maintained payment gateway for clients using C#, ASP.NET, .NET Core, Angular.
- Designed enhancements and updates for subsystems of end-user applications software running on local, networked and Internet-based platforms.
- Lead and participate in the full software development lifecycle, from requirements analysis to deployment and maintenance.
- Played a key role in training and deploying LLMs to automate complex coding tasks and support AI-assisted decision-making processes, increasing backend system performance.
- Trained and mentored junior developers and engineers, teaching skills in Software development and working to improve overall team performance.

Senior Software Engineer Brookstone - Port Harcourt
09/2019 - 09/2022

- Led multiple large-scale projects and conducted extensive code reviews, maintaining adherence to industry standards.
- Trained and mentored team members, emphasizing quality and adherence to best practices across multiple languages and frameworks, including C#, .NET Core, C/C++, ReactJs, Angular.
- Worked with more than 50 customers for needs analysis, proposal development and vendor costs to produce competitive estimates.
- Wrote highly maintainable, solid code for software system using C#, ASP.NET, .NET Core, ReactJs, forming core framework and earning consistent praise from subsequent developers since initial version.
- Key Technologies used include; C#, .Net Core, C/C++, ReactJs, Angular, NodeJs, Javascript, Typescript, SASS, MongoDB, MySQL, SQL, PostgresSQL, Redis, Java, Python, Firebase, Azure DevOPs, GCP, TDD, RESTAPI, MVC Framework, Docker, Kubernetes.

Senior Software Engineer Dietams - Port Harcourt
12/2017 - 08/2019

- Performed code reviews to ensure quality standards were met by development teams.

- Designed, developed, tested, and deployed high-quality applications utilizing Agile methodology.
- Key Technologies used include; C#, ASP.NET, .NET Core, ReactJs, Angular, NodeJs, Javascript, Typescript.
- Mentored newly hired software engineers through routine coaching and training opportunities.

Software Engineer Multichoice - Port Harcourt
01/2017 - 12/2017

- Planned and developed interfaces that simplified overall management and offered ease of use.
- Documented technical workflows and knowledge in private wiki for education of newly hired employees.
- Designed intuitive graphical user interfaces using knowledge of serial communications and database design to improve user experience.
- Participated in cross-functional projects while working in lean development environments.
- Key Technologies used include; Angular, ReactJs, NodeJs, AngularJs, MongoDB, SQL, PostgresSQL, Javascript, Typescript, SASS, C#, .Net, Java, Python, Firebase, GCP, REST API, MVC Framework.

Software Engineer Intern SaskTel Inc. - Port Harcourt
06/2016 - 01/2017

- Brainstormed with engineering team to determine appropriate code testing processes.
- Collaborated with other developers to identify and alleviate number of bugs and errors in software.
- Key Technologies used include; C#, ASP.NET, .NET Core, C/C++, ReactJs, Angular, Javascript, Typescript, Java.

EDUCATION

Bachelor of Science: Computer Science
University of Regina

Bachelor of Science: Electronics Engineering
University of Regina - Saskatchewan, 01/2012

CERTIFICATIONS

ReactJS Certification, 06/2022

C# Certification, 01/2023
